UNITED NATIONS ACTIVITY REPORT

On the occasion of the [World AIDS Day](#), the [United Nations](#) hosted 'Ending the AIDS Epidemic by 2030: How can civil society revitalize the response?'

The event was held on 1 December 2016 at the United Nations Headquarters, New York City, NY, USA.

Report Submitted by Constance Sobon Sensor, STTI United Nations Liaison

This was a panel discussion presentation that focused on local efforts with a global outreach. Useful examples were presented to prevent mother/baby transmission, to provide understanding of the scope and history of the disease, and to provide education to girls and women in developing countries by combining the sport of soccer as a platform for social gathering while raising awareness of HIV and primary and secondary prevention in the local communities.

The session was recorded at [UN Live United Nations Web TV](#).
