

Cleveland Clinic Abu Dhabi is an unparalleled extension of US-based Cleveland Clinic's patient-centered model of care, combining state-of-the-art amenities with the best global clinical practices to deliver exceptional patient care.

Opened to patients in 2015, the hospital is a physician-lead medical institution served by North American board-certified (or equivalent) physicians. Located in the heart of the UAE capital, Cleveland Clinic Abu Dhabi is the result of an agreement signed in 2006 between the Mubadala Investment Company and US-based Cleveland Clinic. Its mission is to offer patients in the UAE and the wider region access to world-class care, close to home.

Every aspect of Cleveland Clinic Abu Dhabi has been developed with the patient in mind, providing a seamless end-to-end patient experience. The hospital acts as a catalyst for medical innovation and follows the highest international standards of quality and patient safety across all its operations.
