

# JOIN THE UNIVERSITY OF NEW MEXICO

---

## Researcher, scholar, innovator. Nurse.

We don't just educate nurses. We change the entire field of nursing. Educate inquisitive professionals who improve patient care. Our faculty benefit greatly from working within a Carnegie-ranked R1 research university. We are scholars, and enhance the practice of nursing through a wide range of research efforts. Like developing new understanding of health among diverse, vulnerable populations. And addressing health equity as it relates to rural health, chronic illness, women and children's health and health policy issues.
