You make this possible!

Over the last few years, many of you became Sigma Foundation for Nursing donors to help nurses around the world heal, lead, and learn through the Vision 2020 Campaign. Last June, the US $4 million campaign goal was achieved thanks to bequests, your donations, and the volunteer leadership of the Foundation board, committee members and other volunteers, and Sigma board members.

The Vision 2020 Campaign was fully implemented during the 2011-2013 biennium and concluded halfway through the 2017-2019 campaign. During that time there has been a 67% increase in the number of Foundation donors giving to the Future, Leadership, Research, and sustaining funds. Thank you!

In just a couple of years, Sigma will begin celebrating its 100th anniversary. The Foundation wants to join you in making sure that there will continue to be increased grant funding for nursing research, evidence-based practice, and leadership; membership subsidies for future inductees; and new Sigma program support for all generations of nurses around the world for the next 100 years. Watch for details later this year. Remember, these are only possible because of your Foundation donations. Thank you again for joining the Foundation to support all generations of nurses.

Gratefully,

Lynn Lambuth
Sigma Foundation for Nursing
Chief Administrative Officer
FUTURE

Donations to the 21st Century Permanent Fund support emerging Sigma initiatives.

You’ve increased program support to Sigma by 65%!

Your donations to the Foundation’s Future Permanent Fund provided a 65% increase in program support to Sigma. Those funds helped make possible the Global Advisory Panel on the Future of Nursing and Midwifery that engaged nurses and midwives around the world.

Your donations also supplemented the Johnson & Johnson Global Community Impact grants to the Maternal-Child Health Nurse Leadership Academy (MCHNLA) Africa, which is improving health outcomes for thousands and thousands of mothers and babies in five African countries.

LEADERSHIP

*Donations to the Leadership Fund provide leadership education grants and membership subsidies.*

**You've increased leadership education grants and membership subsidies by 60%!**

Your donations to the Foundation’s Leadership Fund resulted in a 60% increase in leadership education grants and membership subsidies to more than 1,000 nurses and new Sigma inductees around the world.

Most recently, we received more than 100 leadership education grant applications to attend the upcoming Sigma International Nursing Research Congress in Calgary, Alberta, Canada, and we are funding 20 members from five global regions. Most of the recipients are presenting research at their first international conference.

*Nu Beta at-Large Chapter member Rebekka Lerma.*

Rebekka was able to be inducted into Sigma’s Nu Beta at-Large Chapter after receiving an Edith Anderson Membership Subsidy from the Sigma Foundation for Nursing’s Leadership Fund.
RESEARCH

Donations to the Research Permanent Fund provide small and collaborative research grants.

You are increasing research grant funding!

Your donations to the Foundation's Research Permanent Fund have increased research grant funding by 40%, providing more grants to nurses who are improving the health of the world's people.

Small grants that will be funded next month are going to researchers in four global regions addressing a variety of health issues from diabetes to oncology. Also, we are presenting our first collaborative research grant with the National Association of Hispanic Nurses later this year.
